Scarlet fever causes the loss of nearly 9,000 lives, 83 per cent occurring before the tenth year of life. After long experimenting a way has been found to utilize the coarser textiles of the fiber of the Cuban malva plant, of which there are 11 varieties. Success is attending experiments in Sweden with perforating the webs of street car rails to increase their resiliency and add to their life when laid on rigid foundations.

New York city is to have another magnificent church building—that which will house St. Bartholomew's Episcopal church. It will occupy an entire block front on Park avenue, from Fifth to Fifty-first street, and will probably cost more than \$4,000,000. The rector of St. Bartholomew's, Dr. Leighton Parks, says that this vast sum "cannot be raised on subscriptions of \$5,000 and \$10,000; it will require subscriptions of \$100,000." The congregation believe that these sums will be forthcoming.
